NOTE: When I'm not working I like to read, watch A LOT of - mostly SciFi - movies and series and repair notebooks and PCs. I also have a strange addiction for the old software and hardware plus I like every oddware. In my free time, I enjoy taking long walks in the nature when I'm not driving my car, which is my other hobby.

I CAN BE YOUR...

I am managing hundreds of different websites and I can fix any issues regarding the site, the domain or the hosting server itself.

In the last few years I have worked with all popular Linux distributions and I have managed dozens of VPSs and dedicated servers for my clients.

MALWARE EXPERT

If a site got hacked then I can identify and patch the security vulnerability and I can remove the malware completely.

I create websites from scratch. My favourite platform is WordPress but I'm familiar with other popular CMS systems too.

TESTIMONIALS

SUZI KADES UNITED STATES

Ferenc was a joy to work with. His communication skills were fantastic. He was completely devoted to my project until its completion, and even though there was a 9 hour time difference between us geographically, he kept me updated every hour. I highly recommend him!

TIM DIMMICK GRANDSLAM MARKETING

An absolute pleasure to work with, Ferenc was very knowledgeable, and communicated constantly with progress. Something told me when reviewing his credentials that he was the perfect person to assist me, and I was right. Highly recommended!

ROB DIX PROPERTYGEEK.NET

Ferenc was brilliantly once again. He reacted to solve my malware problem within a couple of hours - I sent him the relevant details, and next thing I knew it was done! He also explained clearly what he had done. Ferenc is clearly technically talented, but importantly he is also a strong communicator. Highly recommended!
